

Z.Tex 226

WATER BASED ADHESIVE FOR CLOSING ROOM ASSEMBLIES

Description

Z.Tex 226 is a concentrate natural rubber latex.

After drying the film keeps permanently smooth, flexible and doesn't stiffen the coupled materials.

The low content of ammonia, hold as stabilizer, makes the product safe if during the use the normal precautionary measures are fulfilled.

Applications

Thanks to the maintenance of flexibility of the porous materials **Z.Tex 226** is particularly suited for all the lining operations, such as the bonding of upper to lining and of reinforcement materials, in which is required high green strength.

Characteristics

Composition	: natural rubber in water dispersion
Mode of setting	: by evaporation of water
Colour	: dispersion is white, turning transparent when drying.

Technical data

• Solid content	: 61%
pH	: 10
• Ammonia	: 0,3%

• Value valid for product supply specification upon leaving the factory

Method of use

Application: the glue usually is applied by brush, by a roller machine or by a spray device (nozzle 1,5-2 mm., pressure 2-3 bar) onto one side only. At least one of the adherends should be permeable to water.

Drying time and Assembly: in one-way application join the parts at "wet" immediately after the application of the adhesive, before the filmation starts. The filmation time depends mostly on the porosity of the material. Initial bond strength and cohesion are very high.

Storage stability

6 months in the original unopened container. The product is affected by frost.
Keep preferably at a temperature range of +10°C+25° C.

All recommendations relating to the application and use of Fratelli Zucchini products have been given in good faith, based on the company's knowledge and experience. Products must be appropriately stored, handled and applied in normal conditions, as indicated on their respective Technical Datasheet. The variability of materials, substrates and conditions of use is such that no warranty of their functionality for a specific application can be deducted from this information, written recommendation or any other type of suggestion offered. Each user has the responsibility to make adequate evaluations on the efficacy of Fratelli Zucchini materials, products, services, recommendations and suggestions for the specific application required and must accomplish sufficient testing to ascertain that the final product will be safe and sound for the final purpose of the end-user. Fratelli Zucchini cannot be considered liable for any damage, direct or indirect derived from an incorrect use of the products
