

SOLVENTE AP

Thinner for polychloroprene adhesives.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/120

Cleaner to remove traces of adhesive from uppers without damaging leather and synthetic finishing.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/121

Thinner for polyurethane adhesives.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/133

Thinner for **SD/14** and **SD/14 EL** - Thinner for polyurethane adhesives in application by machine.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/141

Cleaner for rubber, polyurethane soles and synthetic uppers. Medium drying. High cleaning power. Cleaner for tools and roller machine. Thinner for PU adhesives.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/142

Cleaner for rubber, polyurethane soles and synthetic uppers. Fast drying. Cleaner for tools and roller machine. Thinner for PU adhesives.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/198

Cleaner for rubber and plastics.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/216

Cleaner for solvent wiping polyether sole.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/218

Cleaner at low evaporation rate, for wiping polyether soles and hard substrates.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/142/E

Cleaner for rubber, polyurethane soles and synthetic uppers. Fast drying. High wiping power. Cleaner for tools and roller machine. Thinner for PU adhesives.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

ST/143/E

Cleaner for rubber, polyurethane soles and synthetic uppers. Medium drying, high cleaning. Cleaner for tools and roller machine. Thinner for polychloroprene and PU adhesives.

Storage stability: 18 months in the original container. Protect from heat. The products are highly flammable.

NERO GC/N

Black colour for polyurethane and polychloroprene adhesives. Colours can be added to the adhesives at the rate of 1 - 2% by weight.

Storage stability: 12 months in the original pack. Keep at a temperature range of +5°C and 25°C.

NERO GT/N

Black colour for polyurethane and polychloroprene adhesives. Colours can be added to the adhesives at the rate of 4 - 5% by weight.

Storage stability: 12 months in the original pack. Keep at a temperature range of +5°C and 25°C.

UV MARKER

UV rays detector for halogenating primers **AC/20** and **AC/23**. Added at the rate of 3 - 5% it reveals traces of treatment on rubber soles.

Storage stability: 12 months in the original pack. Keep at a temperature range of +5°C and 25°C.

Z.TEX UV MARKER

UV rays detector for polyurethane adhesives in water dispersion added at the rate of 1 - 3% it reveals traces of treatment on soles.

Storage stability: 12 months in the original pack. Keep at a temperature range of +5°C and 25°C.

HEALTH & SAFETY ADVICE

See Safety Data Sheet.
