

Z.Pren 584/N e 584/NS

Adhesives for bonding polystyrene foam

Description

Z.Pren 584/N is a solvent based adhesive suitable for bonding polystyrene foam to itself and to other porous and non porous substrates, suited for brush application.

Z.Pren 584/NS is specific for spray application.

Uses

For bonding polystyrene foam to itself, metals, plastic laminate, uPVC, wood, painted plates, concrete, plaster.

CHARACTERISTICS

Composition	: block copolymers, synthetic resins in a blend of organic solvents
Consistency	: low viscosity liquid
Mode of setting	: solvent release
Colour	: pale yellow
Solvents	: blend of hydrocarbons
Service temperature range	: -20°C/+60°C; the adhesive can be used with the addition of 3% of DESMODUR RE or RF/E to improve heat resistance to the bond
Pot life	: 4 hours with vulcanising agent

Technical data

METHOD OF USE

Surface preparation: the surfaces must be dry, clean, free from dust and oily matters.

Application :

584/N : apply by brush a thin coat of product onto the parts to join.

584/NS : apply the adhesive with a spray device (nozzle 1,5-2 mm, pressure 2 bar) onto both the parts to join.

Drying time and assembly: allow to dry at least 10-15 minutes so that solvent can evaporate. Solvents present in the adhesives do not swell polystyrene foam. However avoid to bring into contact the substrates immediately after the application of the adhesive especially with non porous materials, since the retaining of high flammable vapours could occur.

Bring the parts in contact by an uniform pressure. The adhesive sets immediately and does not allow adjustments.

Bond strength increases with time reaching its maximum value 48 hours after the assembly.

Coverage: 200-250 gr/m²

Packaging: tin kg 0,850 4 5

STORAGE STABILITY

24 months in the original sealed pack stored in a dry place at a temperature range +5°C+25° C.

All recommendations relating to the application and use of Fratelli Zucchini products have been given in good faith, based on the company's knowledge and experience. Products must be appropriately stored, handled and applied in normal conditions, as indicated on their respective Technical Datasheet. The variability of materials, substrates and conditions of use is such that no warranty of their functionality for a specific application can be deducted from this information, written recommendation or any other type of suggestion offered. Each user has the responsibility to make adequate evaluations on the efficacy of Fratelli Zucchini materials, products, services, recommendations and suggestions for the specific application required and must accomplish sufficient testing to ascertain that the final product will be safe and sound for the final purpose of the end-user. Fratelli Zucchini cannot be considered liable for any damage, direct or indirect derived from an incorrect use of the product.
