

5360 - 5362L - 9901HT

ADHESIVES FOR LASTING OPERATIONS

5360-5362L-9901HT are one-part polychloroprene adhesives suitable for lasting of uppers to insoles, as well by hand than by machine work. High green strength and excellent resistence to owen temperature for uppers ironing, characterised by different drying time and open times. **9901HT** is recommended for lasting "Ideal" shoe.

CHARACTERISTICS:

	Composition Mode of setting	: polychloroprene rubber, synthetic resins in a blend of organic solvents : solvent release
Colours : amber	Colours	: amber
Solvents : esters, ketones, aliphatic hydrocarbons	Solvents	: esters, ketones, aliphatic hydrocarbons

TECHNICAL DATA

	<u>5360</u>	<u>5362/L</u>	<u>9901HT</u>
Solid content(%)	22-24	22-24	22-23,5
Viscosity Brookfield(spindle4/spd. 50/25℃)mPas:	2100-2500	2500-29 00	2400-2600

Values valid as product supply specification upon leaving the factory

METHOD OF USE

Application: apply by brush an even coat of adhesive on both substrates to assemble.

Drying time: each adhesive has a different drying time, the choice depends on the time requested for lasting operation.

Approximate values of drying time and open time in cold working are expressed in the schedule (23°C;50% R.H.):

	<u>Min. Drying time</u>	<u>Open time</u>
5360	5'	15' fast drying, low tack
5362/L	10'	30' medium open time, good tack
9901HT	10'	60' very long open time, high tack

Assembly: lasting operation can be done both by hand and lasting machine. Ironing of uppers, roughing and application of adhesive for bonding uppers to soles can be done immediately owing to a very high green strength of the adhesives.

Thinner: Solvente AP

STORAGE STABILITY

12 months if kept in the original sealed pack, in a dry place, at a temperature in the range $+5^{\circ}$ up to 25° C.

All recommendations relating to the application and use of Fratelli Zucchini products have been given in good faith, based on the company's knowledge and experience. Products must be appropriately stored, handled and applied in normal conditions, as indicated on their respective Technical Datasheet. The variability of materials, substrates and conditions of use is such that no warranty of their functionality for a specific application can be deducted from this information, written recommendation or any other type of suggestion offered. Each user has the responsibility to make adequate evaluations on the efficacy of Fratelli Zucchini materials, products, services, recommendations and suggestions for the specific application required and must accomplish sufficient testing to ascertain that the final product will be safe and sound for the final purpose of the end-user. Fratelli Zucchini cannot be considered liable for any damage, direct or indirect derived from an incorrect use of the products
