ACCELERATOR K/E 3

PRODUCT DESCRIPTION

Aromatic poliisocyanate in organic solvents, to be used as a curing agent for polyurethane-based, polychloroprene-based and block copolymers-based adhesives in solution

DATI TECNICI

Composition: polyisocyanates in organic solvent

Consistency: low viscosity liquid

NCO content: $6 \pm 0.5\%$

Colour: light brown straw yellow

Solvents: ethyl acetate

METHOD OF USE

If added in proportion of 4 - 5% by weight to the adhesives, the vulcanizing agent improves heat resistance of the glueing and adhesion to many materials such metals and rubber.

The blend adhesive + crosslinker must be used within 5 - 6 hours from the preparation, depending on environment temperature. Always refer to the specific instructions reported in the TDS of each adhesive.

SAFETY AND HEALTH

See Safety Data Sheet

STORAGE STABILITY

12 months in the original sealed packing stored in a dry place at a temperature range +5°C /+25° C.
